VIII. CALIBRATION

Funkarmbanduhr dans le Guide de l'utilisateur Design Station

I. Fonction

- La réception radio du signal DCF
- Fonctionnement avec 3V CR2016

Fonction II touches A (terminaison) couronne sans touche de fonction B (réception radio manuel)

III. Mise en service

La fonction de réception radio est automatiquement désactivé lorsque l'horloge de plus de 3 jours avaient pas de réception radio.

Par conséquent, appuyez et maintenez le bouton B pour une période de 3 secondes, puis redémarrez sorte que la réception de la radio. Maintenant en direct à partir de l'horloge de sorte qu'il peut recevoir et traiter non perturbée du signal radio.

Que l'horloge est en contact avec le signal ou récepteur est indiqué par la position de l'aiguille des secondes. La seconde main est sur la trotteuse est à 29 minutes - la réception est activée. 31 minutes - bonnes possibilités de réception.

Le réglage de l'horloge sur le temps nécessaire DCF 3-7 minutes. Pendant ce temps, l'horloge ne doit pas être déplacé.

Après avoir reçu le temps et la mise à l'heure exacte, vous pouvez demander si la réception a été un succès ou non. Pour cela appuyez et maintenez le bouton B pour 3 secondes, puis soulevez la seconde main comme suit: réception réussie est pas reçu avec succès

En cas d'échec d'une réception répéter le manuel de recevoir et de positionner l'horloge à un autre endroit.

Le temps est automatiquement reçu tous les jours ou ajusté 3,00 4,00 5,00 horloge et de l'horloge de radio.

Vous pouvez utiliser la fonction mentionnée ci-dessus, même lorsque les différences de temps plus petites, par exemple la seconde devrait se produire.

IV. Réinitialisation complète de l'horloge avec de grandes variations dans le temps Il existe toujours la possibilité que l'horloge indique un temps différent ou complètement la batterie a été modifié.

Voici de procéder comme suit:

1. L'horloge a un point de référence, à extrapoler à partir de laquelle chaque signal d'horloge, le temps - qui est avec 12:00 horloge - poste.

Appuyez et maintenez les deux boutons A et B simultanément pour la période de 7 secondes. L'horloge met les bouchées doubles - toutes les mains se déplacent.

Si le fonctionnement overdrive vous avez la possibilité de laisser le pointeur correspondant à la position des mains se déplacer dans un sens ou de raccourcir la période d'ajustement.

Pour ce faire, appuyez sur et relâchez le bouton A et le bouton B - les aiguilles tournent dans le sens opposé.

2. Avant la position 12:00 horloge que vous maintenez le pointeur en appuyant au
